RM03 Symposium Rose 2021

-unoaked / dry / crisp / peach / citrus

1971 Blanc de Blancs Sparkling 2019

Traditional method / dry / apple biscuits / bubbles

ACHRIMÈRE

The vineyards of Achrimère are located just south of the 45th parallel on the sandy loam soils of Old Mission Peninsula. Because of its special disposition in Northern Michigan, surrounded on all sides by Lake Michigan, Old Mission Peninsula AVA. benefits from an extended growing season. The synergy between land and water provides a unique micro climate of warmer, moderating temperatures, which protects wine grapes from frost and cold situations that can *freeze our buds off*. We are committed to small production wines of the highest quality.

Without you there is no me, we or us.

This wine is dedicated to my parents in their 50th year of marriage.

The Achrimère '1971' Blanc de Blancs Sparkling wine is comprised of 100% Chardonnay. In 2019 the wine underwent primary fermentation in tank followed by a 'traditional' secondary fermentation in bottle and was aged for fifteen months. This sparkling wine pairs with everyday moments and impressive milestone events: *Happy 50th Anniversary.*

You see a vineyard, but I see integral parts of a whole.

Some of the most important work is behind the scenes.

Symposium is dedicated to the mystery behind the curtain.

The 2021 Symposium rosé is comprised of 100% Pinot Gris. The color comes from an extended cold soak of the grapes on their dark purple skins. This medium bodied rosé has the perfect balance of fruit and acidity making the wine perfect for a summer night on the deck or curled up by the fire.

ACHRIMÈRE

OLD MISSION PENINSULA

ESTATE
CHARDONNAY
2020

CM10 - no butter, no vanilla, just fruit

The fruit is as pure as its namesake - Christopher

There are over 5,500 Chardonnay vines planted on The Vineyard at Achrimère. We focused our plantings on Dijon clone 70(96) because of its ability to develop an even fruit set in cooler conditions. The grapes are fermented and then the wine is aged for eight months in stainless steel to retain the original character of the fruit. This dry wine shows crisp acidity with notes of apple and tropical fruits.

EM12 - The full expression of the Pinot Gris grape

Saturated with character just like the person it is named after - Emerson

Nearly 40% of the Vineyard is planted with Pinot Gris 04(53) Clone, which hails from Alsace, France. The grapes are fermented and then the wine is aged in stainless steel for eight months. The style of this medium-bodied wine shows the extent of what Pinot Gris can do – it is a beautifully dry wine, with notes of peaches and honeyed nectarines.

ACHRIMÈRE

Old Mission Peninsula AVA

Located just south of the 45th Parallel, in the heart of Northern Michigan wine country, our vineyard produces boutique wines that reflect our unique climate and terroir.
